Just who are we? Meet your classmates and find out.

Our Chapter members in the College of Information's graduate program live all over the world, and are interested in a wide variety of information studies, from children's library services to information technologies. In this issue we'll get to know a few of our students in the program.

Kevin Brahm
Palm Harbor, FL

Employed?
No

How many courses this semester?
Four. Fall 2008 was my first semester in this

program. However, if all goes well, I should graduate Summer 2009. I came into the program expecting to follow the web development and IT track. I'm still basically on that track, but course availability might be an issue in completion.

What do you hope to accomplish with your degree?

I enjoy learning new things, and I hope this will add to my credentials as I attempt to get a new job. I came into the program more about web development, but I'm more open to other options as well like IS, IT, and things like that. I am not a library-first student, but I haven't shut the door to a library either. Each course I take gets me more interested in something, and at the same time, fearful that I might not be able to do it an expert level. I hope that throughout my course work with CI I can add more baseline knowledge

that will help me if I get to try to get certified on a system such as one that Microsoft offers.

Personal Stuff?

I am married (over 3 years), no kids - but right now we do have a pet chameleon named Cai, and three fire-bellied toads. I have three other degrees from FSU. BS Communication (Media Studies), BS Physical Education (Sport Management), and MS Sport Administration. This is just a guess, but I'm probably the biggest college football fan in the program.

Lori Cadotte
Bowling Green, KY

Employed?
Full time as the Registrar at Draughtons Junior College.

How many courses this semester?
I am currently enrolled in 2 classes. I am in my first term

here at FSU and am concentrating the on the Reference track.

What do you hope to accomplish with your degree?

I hope to become a reference librarian in a public library.

Personal Stuff?

I am married with five children. There are three boys and two girls, the youngest of which is going on 16. I am very excited to be in the Library Science program.
